

'Tis The Season For Online Shopping

We all know holiday shopping online saves time and money. But, you need to be careful. The following tips will help you have a safe, secure online shopping experience this holiday season:

1. Secure your computer. Make sure you have up-to-date antivirus, antispyware, and antimalware software installed.
2. Know the retailer. If unfamiliar with the retailer, look for more information about the company by running an online search to see if it is reputable. If you're still not sure, check the Better Business Bureau's website at www.bbbonline.com.
3. Make sure your transactions online are secure. Look for the "lock" icon on the browser's status bar and be sure "https" appears in the website's address bar before making an online purchase. The "s" stands for "secure" and indicates that the webpage is encrypted.
4. Use strong passwords. Use passwords with at least eight characters and numbers and use both upper and lower case letters.
5. If possible use a credit card instead of a debit card. Credit card charge transactions are protected by the Fair Credit Billing Act. If online criminals can get your debit card information, they have the potential to empty your bank account, thus leaving you without liquid funds available.
6. Keep a record. Keep a record of your online transactions, including product description and price, online receipt, and copies of every e-mail you send or receive from the seller. Remember to review your credit card and bank statements for unauthorized charges.

PFCU has given over \$19,000 in scholarships to members wanting to further their education. PFCU is offering two \$1,000 scholarships to members of the credit union and you could be the member to win.

Look for the Lock...and 's'

When a web page asks you for sensitive information, you need to be able to identify if the page is secure or not. The ability to recognize a secure web connection is extremely important as online fraud cases continue to increase.

There are two general indications of a secured web page:

Check the web page URL

Usually, when browsing the web, the URLs (web page addresses) begin with the letters "**http**", a secure connection should begin with "**https**".

Check for the "Lock" icon

A standard among web browsers is to display a "lock" icon somewhere in the window of the browser.

Click (or double-click) on the lock icon to see details of the site's security. This is important to know because some fraudulent web sites are built with a bar at the bottom of the web page to imitate the lock icon of your browser! So test the functionality built into this lock icon. It is very important to **KNOW YOUR BROWSER!** Check your browser's help file or contact the makers of your browser software if you are unsure how to use this functionality.

Other Indicators of a Secured Web Page

Many SSL Certificate vendors (**VeriSign**, **GeoTrust**, **SSL.com**, etc.) also provide a "**site seal**" to the owners of these web sites.

Online merchants want you to see these site seals. They want you to know they have made every effort to make their site a safe shopping experience. For that reason the site seal is usually located where you, the customer, can easily see it.

These site seals should not necessarily be trusted on their own, but should serve as a reminder to "investigate further".

We are now taking donations at our office and we need your help! Enclosed in the envelope is donation slip for this great cause. Please donate as little as \$1.00 to make this a special Christmas for the kids.

Also, when you visit the office, just look for the jars that have “Can you spare some change” written on them and we are also selling all types of small teddy bears. All of profit will go into our Christmas Fund.
